

Project Design Phase

Proposed Solution Template

Date: 24 June 2026

Project Name: Visualization Tools for Electric Vehicle Charge and Range Analysis

S.No.	Parameter	Description
1	Problem Statement	EV charging station and vehicle information is scattered, making analysis and comparison
2	Idea / Solution Description	Develop an interactive EV analytics system using MySQL and Tableau to visualize charging
3	Novelty / Uniqueness	Combines EV infrastructure and vehicle analytics into one interactive dashboard with SQL
4	Social Impact / Customer Satisfaction	Helps EV owners, buyers, researchers, and policymakers make informed decisions through
5	Business Model (Revenue Model)	Freemium model with premium reports and analytics for businesses and organizations.
6	Scalability of the Solution	Can be extended with new datasets, real-time APIs, cloud deployment, and predictive ana
